

DEPARTMENT OF

# BIOMEDICAL ENGINEERING

## VISION

To create the world's leading society of professionals devoted to developing and using engineering and technology to advance human health and well-being. This technology helps to improve the human condition through the advancement of clinical care and biomedical science

# MISSION

1. To motivate faculty members and students to explode their creativity to develop innovative products by utilizing modern technologies to serve the society.
2. To inculcate the industrial need of the biomedical engineers among the students through relevant training and value-added courses.
3. To produce technically intense engineers by practicing innovative teaching methodologies.

## PROGRAM SPECIFIC OUTCOMES [PSO]:

1. To design and develop diagnostic and therapeutic devices that reduces physician burn out and enhances the quality of life for the end user by applying fundamentals of Biomedical Engineering.
2. To apply software skills in developing algorithms for solving healthcare related problems in various fields of Medical.
3. To adapt to emerging information and communication technologies (ICT) to innovate ideas and solutions for current societal and scientific issues thereby developing indigenous medical instruments that are on par with the existing technology

# PROGRAM OUTCOMES (POS)

- 1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

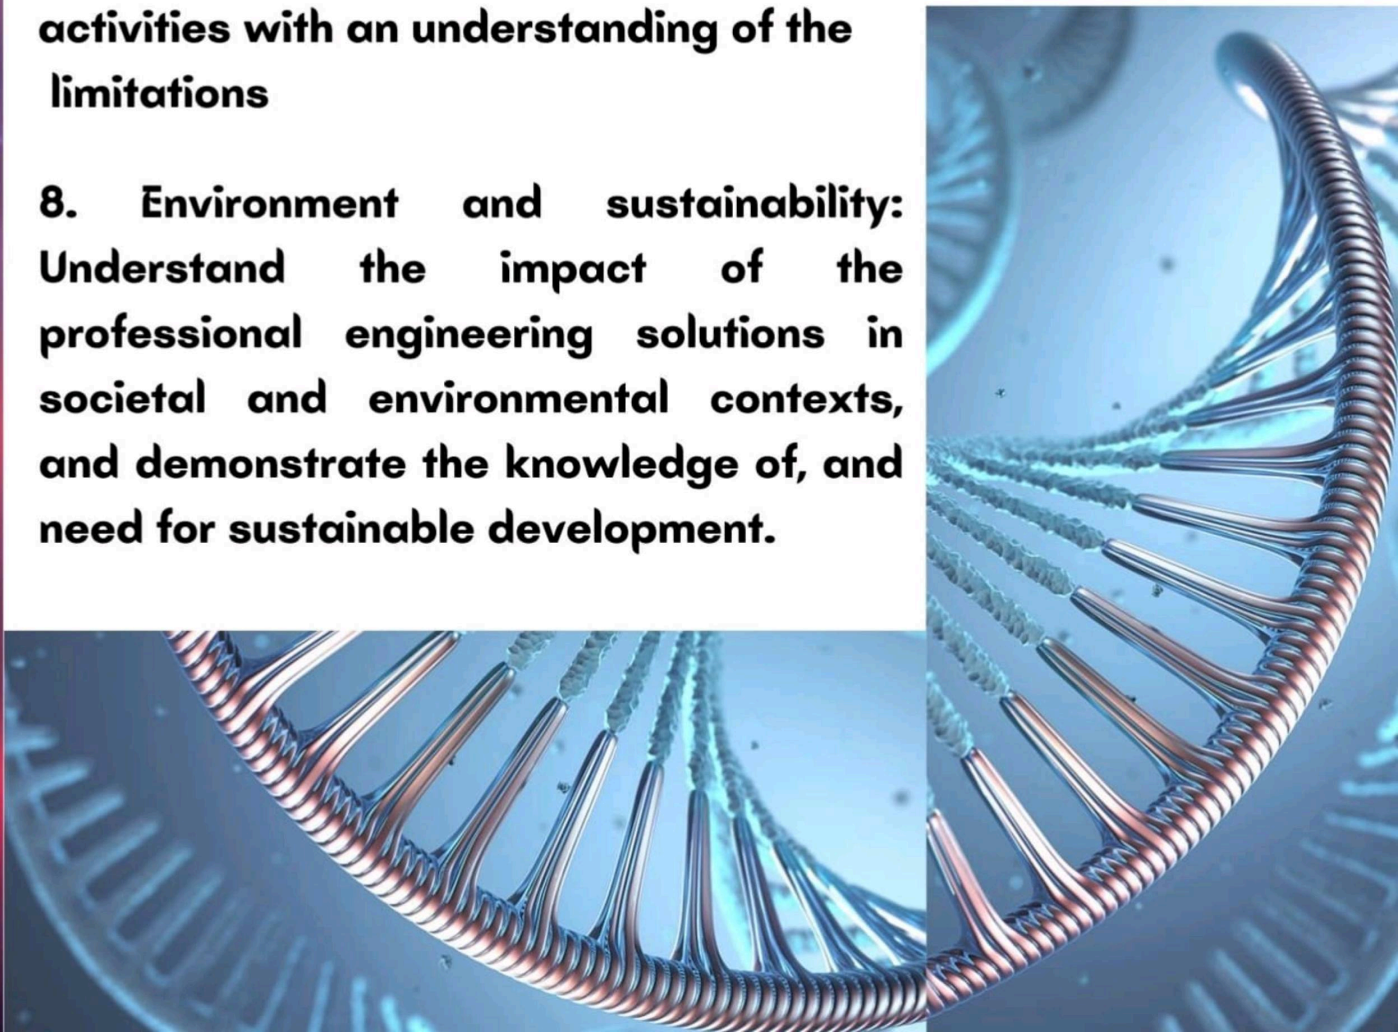

**5. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.**

**6. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.**

**7. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations**

**8. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.**

### **9. Communication:**

**Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.**

**10. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.**

**11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.**

**12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.**

# LABORATORY FACILITIES:

**DIAGNOSTIC & THERAPEUTIC  
EQUIPMENT  
LAB**

**BIOMEDICAL  
INSTRUMENTATION  
LAB**

**DIGITAL SIGNAL  
PROCESSING LAB**

## **BIOSCIENCE LAB**

## **HUMAN PHYSIOLOGY LAB**

## **PATHOLOGY & MICROBIOLOGY LAB**

# LABARROTARY

# STUDENTS INNOVATIVE PROJECTS

**SMART STICK FOR THE BLIND/ELDERLY**

**IOT BASED INSULIN AND GLUCAGON INJECTING SYSTEM**

**IOT ENABLED PPE DEVICE: EXPEDITIOUS PREDICTION OF MORTALITY COVID-19 RISK AVOIDANCE**

# STUDENTS SPORTS ACHIEVEMENTS
